Additional Skills :

Successful Planning Engineer with 14+ years experience in management and execution of engineering, fabrication, construction and operations phases of major upstream oil and gas and petro-chemical projects. The broad spectrum of experience in all areas provides insight into the requirements of all stakeholders, applicable to the mega-project development and execution. Highly proficient in Earned Value Management (EVM), Critical Path Method (CPM), schedule integration and analysis, quantity and man-hour estimating for construction work packaging, construction progress, productivity tracking and reporting, materials management and heavy logistics. I have a strong understanding of the global challenges around establishing robust safety and environmental processes, safety stewardship and implementation of tools necessary to establish a solid SHE culture on a project. I have extensive experience from both the operator as well as the EPC contractor perspective for what it takes to plan a mega project from concept to operations, fulfilling all stakeholder expectations for delivering a project safely, on budget and on time. Project development experience includes working from the FEEP/FEED phases thru detailed design and execution from both project management, Engineering and construction planning roles. Experienced in all phases of engineering processes including conceptual design, optimization, detailed design, 3D model development, constructability and procurement. Extensive experience utilizing Primavera, Microsoft Project, AutoDesk Navisworks Freedom and SAP.
