To Study on customer Satisfaction for wire line products of TATA Tele services.

BE Project

Final Year Project

ADVANCED PC CONTROL USING HAND GESTURE RECOGNITION

The main purpose of this project is to explore the possibility of creating a wireless mouse that could be used in any location without having a flat surface to move it on. This was an endeavour to make a 3D wireless mouse that can be used in any orientation to move mouse pointer correspondingly on PC. We used an accelerometer to measure the linear and tilt movement of hand and transmit the co-ordinates to receiver module connect to PC via USB. It can be used for presentation, in industry to control robots, inspace, and also in gaming console.

EXTRA CURRICULAR:

Actively participated in placement cell in college, helped organizing placement drive

Team Member of National Level Robotics competition organized in college.

Organized business model making competition in college.

Participated in NCC and NCC Camp.
