Additional Information :

WORK EXPERIENCE-

Field HSE Supervisor, KOC:

Currently I am working as a Field HSE Supervisor in Reputed Company, Kuwait. I am working from April 2016 to till date as a client HSE (Health, Safety and Environment) representative. I am rotational salaried seconded KOC employee having 28/28 rotation cycle.

I am personally responsible for the identification and management of HSE risk across seven Land rigs, including three drilling rigs and four work over rigs, in the development drilling group.

- Devising and implementing corporate HSE policy and actively monitoring compliance in line with all legal and regulatory requirements

- Conducting analysis and review of existing Health and Safety practices, developing improvements and supporting the team throughout the change management process
- Acting as a central point of contact on all HSE issues, including the provision of specialist advice on drilling and work over operations
- Conducting testing and maintaining a range of H2S detection equipment, such as breathing apparatuses, air cascade system, air compressors, electronic/tube type gas detectors/systems and rescue devices
- Completing regular rig inspections and safety audits to ensure safe working practices; providing advice in respect of non-compliance and best practice
- Participating in incident investigations, addressing issues and developing solutions as well as ensuring the timely follow-up of corrective actions
- Developing and delivering HSE training for both new and existing staff in addition to providing regular safety alerts following potential near misses and incidents
- Updating and maintaining all HSE documentation and records, including the safety critical equipment register and certifications
- Additionally responsible for conducting well control equipment certification, verification and follow up in liaison with contracting teams

Key Achievements

- Spearheading the introduction of hazard identification during drilling operations and coordinating with the site team on the implementation of mitigation measures during operations
- Directly contributing to the introduction of management KPIs across all business sites, enabling enhanced performance management and control
