Additional Skills :

PROFESSIONAL OVERVIEW:

A competent professional offering 3 years of extensive and qualitative experience in Construction & Monitoring.

Deft in swiftly ramping projects entailing planning, resource utilization, maintenance, quality management & manpower management; ensuring on-time deliverables.

Acquired significant exposure in ensuring timely completion of projects within the time and cost frames and effective resource allocation in order to maximize outputs.

Understand work scope, quantity and familiar with logical sequences in terms of engineering, manufacturing and construction disciplines.

Conduct field scoping to clarify scope as required.

Understand WBS structure, and work with management and project/maintenance team in the development of work break down structure for progress measurement, scheduling, cost estimating and project control.

Prepare and manage overall master schedule integrating work breakdown structure using scheduling software.

Understand contractual matter, earned value method, critical path method, familiar with scope management and change control.

Coordinate schedule from multiple contractors and incorporate the information gathered into the overall project master schedule.

Prepare cost estimation and schedule bar chart plan considering all in puts manpower, equipments and materials availability, production and construction sequences.

Develop work method of statement or procedure as required.

Understand and able to utilize planning tools such as MS excel, Access, Oracle Primavera p6 8.2, SAP and ERP.

Develop and update resource (manpower and equipment) histogram weekly or monthly as required.

Evaluate allocation of resources and provide recommendations to maintain required progress.

Develop and implement plan versus actual progress charts (histograms/S curves). Reports and analyses deviations from plan.

Tracking the project and activities, monitor and forecast progress of all activities and deliverable such as products, engineering documents, fabrication status and construction of all discipline.

Analyze gaps between the planned and actual progress and highlight the areas of concern which required action of the associate task member.

Perform probabilistic analysis of completion dates and potential alternatives. Present risk based analysis of most likely completion and expected deviation range.

Prepare and update three weeks and three months look-ahead schedule that reflect the priority activities

Liaises with all team leaders and/or members to communicate required completion dates and interface between functional team/operational team and project team.

Participate all meeting (i.e schedule review meeting , progress meeting, coordination meeting, constructability review meeting and so on).

Additional Information :

DUTIES AND RESPONSIBILITY: (PLANNING ENGINEER)

Prepare the Master Schedule In P6 Primavera 8.3 Rev or MSP

Preparation of Organization Chart.

Man power, Machinery and Material planning for the Project

Manpower/Equipment Histogram Loading Chart Generate & Update

Progress S-Curve Generate& Update

Site Facility arrangements

Mobilize the Manpower & Equipment

Prepare the Weekly Look ahead Schedule

Site Monitoring & Leads and organize the planning process.

Follow-up the Procurement Materials Data Sheet

Production Report Update

Attend Weekly Review Meeting

Daily & Weekly Manpower /Equipment Status Update

Daily & Weekly Progress Report Update

Progress Measurement system

Performance Indication Update

HSE Manpower& Hours Update

QA/QC Report Update

Invoice Preparation

Other Allowance Controlling

Develop and maintain resource loaded critical path method (CPM), project master schedules.

Track progress scheduled works, analyze performance, conduct critical path

Analysis, prepare schedule reports and suggest recommendations for corrective action measures which mitigate impacts to cost and schedule.

Monitoring day to day Progress in line With Schedule
