Additional Skills :

Planning Engineer for following projects:

Al Ain Industrial City Phase 1 valued at AED 189 Million
Al Ain Industrial City Phase 2 valued at AED 50 Million
Infrastructure Development for Yas Island (Package 2B) AED 550 Million
Shuttle Bus Link Road (Yas Island) AED 15 Million

Mafrag-Ghweifat International Highway (Bid Preparation) AED 10 Billion
Infrastructure Works for Emirati Housing Community AED 200 Million
Construction of Water Network for 98 Villas- Sheikh Diab Sector-58, Abu Dhabi

My past 3 years have been spent on Mega projects cumulatively valued at \$3 Billion under FIDIC, PPP (Public Private Partnership) contracts managing a team of 4 staff of various levels whilst directly reporting to the Project Director and Project Manager. I am planning at principal contract level overseeing contract durations, space allocations and compensation events whilst installing and maintaining robust reporting procedures.

This role has seen me dealing with the following:

Earthworks, Earth retaining walls, Pumping stations, Irrigation Reservoirs, Sewerage Networks, Chilled Water Networks, Potable Water Networks, Irrigation Networks, Telecommunication Infrastructure Networks, Storm Drainage, Electrical MV and LV Lines, Street Lighting, Road Pavements, Street Furniture, Traffic Signals and communication systems.

With such a large and diverse portfolio of contracts and interfaces a large proportion of my time is spent in careful analysis of both cause and effect in relation to time and cost for subcontracts and Main Contract with the client. To this end much work is done studying contractual milestones, information release schedules, recovery schedules and graphical progress reports.

Key Skill Developments:

Managing Early Warnings and claims with respect to time and cost.

Setting up Sustained management of dedicated control of progress profiles updated CAD files, Contractors look ahead programmes.

Develop Master programme in Primavera P5 and P6 using EPS and WBS structure to meet project control criteria.

Develop standardized reporting formats for labor usage S-curves, Earned Value (Work done), KPI's, productive/ non-productive labor counts and risks.

Review early warnings and compensation events for both cost and time mitigation

Analyse self delivery and subcontractor performance. Write Contractual Letters.

Present Critical path constraints and provide solutions to project client and contract directors.

Additional Roles/ Responsibilities undertaken:

Closely working with Site Commercial team, responsibility to draft all contractual correspondences in the project and forward to Contracts manager for review.

Closely working with the Procurement team and coordination with suppliers to ensure timely

delivery of material in line with schedule milestones.

Closely working with QA Department and Document Control Sections to ensure efficient records management which facilitates quick retrieval of records as and when required.

June 2007- May 2008 Accenture Technology Solutions Pvt. Ltd, Chennai- India

I Worked as Associate Software Engineer for a period of 11 months, as part of the Software Testing Team. On being directly recruited from the University College Campus I joined Accenture on finishing my Graduate course in 2007. During the 11 months I showed great dedication and achievement in familiarizing and educating myself in the field of Softwares even though my engineering degree did not supplement the same.

The decision to move on from Accenture was purely made on my personal desire to work in a field more so related to my Graduate Course.
