## Projects:

Oct 2015 – till date– Working as the Senior Business Analyst for Real-time production organizersolution suite of applications for NSRP Refinery, Vietnam and Asean Bintulu Fertilizer plant , Malaysia. This application helps in supporting and providing operational excellence for informed business decision for the entire refinery business process.

Oct 2013 – Sep 2015– Working as the Requirements Analyst for Production Accounting and Reconciliation Application. This application helps Yield accountant and Production managers to measure, validate, reconcile and publish accurate and reliable production data (in terms of flows, inventories and movements) by balancing a plant (or unit's) inputs with its outputs on the basis of mass or volume. The Production accounting process plays a significant role in enabling informed business decisions in process plants.

Apr 2013 – Nov 2014 – Worked as the Requirements Analyst for Intuition Forms Application. This application helps sites and customers to digitize manual production processes by providing an ability to create intelligent forms to source, review, approve and publish information. It helps project engineers and application engineers to provide ease of configuration capability that allows the project team to build data entry forms for entering and viewing data, particularly for specific business functions.

Nov 2011- Apr 2013 – Worked as the Requirements Analyst for Business Flex suite of products. The Business FLEX® product line provides Manufacturing Execution Systems (MES) capabilities primarily to the refining, oil & gas, chemicals, mining, and minerals markets.

Nov 2011- Apr 2013 – Worked as the Requirements Analyst for Intuition Operations Monitoring solution which provides core capabilities like monitor process and event data, store monitored results and display monitored results which is being developed on the new MES intuition platform for Saudi Aramco, BP Alaska, Flint Hill Refineries.

Oct 2010 – Sep 2011 – Worked as the Requirement Analyst for OMPro320 Solution which

provides systematic limit management, providing the tools for a process plant to set, understand, maintain, and operate with the right limits at all times. This targets major customers like BHP Billiton, BP, ConocoPhillips, Exxon Mobil, HMEL, Marathon, Reliance, Shell, Sunoco, Suncor, and Syncrude.

#### Senior Application Engineer, 2007-2010

Primarily worked as the senior application engineer in the field of Planning & Scheduling, Inventory Management, Yield Accounting. Worked on Production Balance, RPMS, Production Scheduler, Blend Management, Operations Monitoring, Operations Logbook, Operation Instructions applications of Business Flex suite.

System level Understanding of various MES applications like Planning & Scheduling, Yield Accounting & Inventory Management, Operations Management of Honeywell's Process solution. Hands on knowledge about Honeywell PHD and OSI Soft PI Historian. Implementation and support to project teams for the MES Suite of Applications on customer sites like BHP Billiton, BP, ConocoPhillips, Exxon Mobil, HMEL, Marathon, Reliance, Shell, Sunoco, Suncor, FHR, and Syncrude.

#### » Projects Support

Involved in roll out of Production Balance application in HMEL site Bhatinda, provided one week of Hands on Administration and End User training for the site engineers and managers. Trained 7 project specialists and engineers for 1 week on OMPro solution and provided remote support of OMPro Implementation in Reliance Industries across 7 sites in India. Requirements gathering, solution architecture and scope finalization for Intuition Forms project for roll out across 7 ALCOA sites.
