Total Years of Experience	10

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

I am holding a bachelor's degree in mechanical engineering from a reputable university with 10 years of oil and gas industry experience. Facing challenge is my true passion and I shall not leave the challenge unsolved. Throughout my career I always eager to develop myself continuously, strongly motivated to exceed my employer expectation by keeping operational ran smoothly while still handling engineering stuff. Join to Halliburton as an Frac/Acid Engineer associate then in less than 5 years promoted to Frac/Acid Engineer. After getting enough skill as engineer, I moved to Operation Leader managing more than 40 people. During my engineer role, along with my team once doubling company revenue in 6 consecutive months and delivered new technology to enhance client's oil recovery. Due to this achievement, we were awarded an MVP (Maximizing Value and Performance) reward. Getting enough in Frac/Acid work environment, I seek a new challenge and becoming a Well Site Manager at Chevron Pacific Indonesia which currently becoming PT Pertamina Hulu Rokan. This work experience has enriched my profile portfolio in oil and gas industry

1. Pump reconditioning (Sucker rod and PCP type) at heavy oil field with middle to high H₂S environment and risk of steam release/kick from formation.

Education Summary

Course	University	Passing Year	Country
