## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

· To make sure my team work safe every day, every hour and every minute, no exception. · Compliance with the company Code of Conduct. · Compliance with applicable internal and external governing requirements. · Good and clear communications with all involved parties · Concern and keeping all emergency equipment is in good condition and configured as required. Sufficient stock of spare parts and materials required is maintained · Meeting activities in a proactive and constructive manner. · All relevant governing documents are adhered to by direct reports. · All relevant governing documents are revised as and when required. · That clear daily guidelines are provided to all direct reports. · All software licenses, back-ups and upgrades are maintained · Visible leadership by spending time in the field and monitoring daily operations. · Required logbooks are maintained and updated as per requirements. · Thorough handovers are provided at each daily change of shift. · Subordinates are trained to fill higher positions. When your team is divided over problem-solving approaches, it's crucial to steer towards collaboration. Here's how to handle the clash: - Establish open dialogue by creating a safe space for each member to voice their perspectives. - Identify common goals to unify the team's focus beyond individual methodologies. - Facilitate a solution-focused workshop where all methods are explored and the best are integrated. • Install, maintain and repair all electronic equipment onboard the rig. • Ensure that all incomplete repairs and maintenance projects are finished in a safe manner, within the scheduled time frame, accurately, and in an efficient manner in order to keep the backlog of work to a minimum. • Ensure that equipment failure is kept to a minimum and within contractual limits. • Ensure that entries on permits, isolation tags and logs accurately reflect the current status of equipment. • Perform regular inspections of work sites and ensure the work is being done within the confines of the permit. • Ensure tracking of all programmable logic controls and software versions and update as required. • Ensure that a high standard of housekeeping is maintained onboard the rig in all work areas. • Maintain good two-way communication with crew members. • Participate in the development of newly appointed team members.
