-----------------------------------	--

I have checked all the operation of drilling rig activities,drilling process,well designing,well operation and safety protocol with team working.During my experience in the drilling industry, I have been actively involved in various critical operations, ensuring efficiency and safety throughout the process. I have meticulously monitored and supervised drilling rig activities, ensuring all tasks were performed according to industry standards and best practices. My role encompassed overseeing the entire drilling process, from spudding to reaching the target depth, while addressing any challenges that arose. I have also been engaged in well design, ensuring that all technical specifications were met and that the design complied with geological and engineering requirements. Additionally, I have managed well operations, including casing, cementing, and completion activities, ensuring the seamless execution of these tasks. Safety has always been a top priority, and I have strictly adhered to safety protocols to mitigate risks and prevent accidents, fostering a safe working environment for the entire team. My collaborative approach has allowed me to work effectively with multidisciplinary teams, ensuring clear communication and efficient task execution. This hands-on experience has strengthened my expertise in managing drilling operations, designing wells, and implementing safety measures, contributing to successful and cost-effective drilling campaigns.

I have done diploma of information technology,health safety diploma,and project management diploma
