Roles and Responsibilities	Additional Skills/Certification
PT. Pertamina EP - Reservoir Simulation Engineer Intern As a Reservoir Simulation Engineer Intern, I was responsible for collecting and processing reservoir data, including well logs, core data, and production history, to prepare inputs for simulation models. I conducted reservoir simulations, focusing on history matching and production analysis, to evaluate reservoir performance and develop optimized field strategies. I assisted in analyzing simulation outcomes, identifying key reservoir characteristics, and providing actionable insights to support management decisions. My work directly contributed to the validation of a reservoir model with an accuracy rate exceeding 90%, ensuring a robust foundation for effective reservoir management. This experience enhanced my technical skills in reservoir engineering and simulation, strengthened my analytical capabilities, and provided valuable exposure to real-world challenges in the oil and gas industry.	Occupational Safety & Health Supervisor in Oil and Gas Industry, General OHS Expert, Petrel & Eclipse: Model Static Development & Lithofacies, tNavigator: Assisted History Matching, Reservoir Simulation with tNavigator
