Salary (in USD)	4000/
Industry	Drilling / Rig
Sub Industry	
Nationality	Algeria
Primary Language	English,
Secondary Language	
Total Years of Experience	11

## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

Knowing the safety rules and working safely and following the work steps in safety (work permit, short work meetings. Work risk analysis....). Adopting the principle of good communication equals good work and good results. I know very well that my safety and the safety of my colleagues and my work equipment is more important than finishing my work in a short time, and this is what helped me to be successful in my field of work. My duties as a driller include implementing the drilling supervisor's orders with precision, expertise and without difficulty, and supervising the framing, leadership and direction of the work team. My duties include knowing the drilling stages and preparing supplies and equipment for each stage. My roles include knowing how to deal with drilling problems and difficulties and finding temporary and sustainable solutions. My duties as a driller, if not the most important, include knowing how to secure the drilling well in the event of gases or rise in the drilling fluid. My duties include knowing all the basic drilling handlig tools that must be on the surface of the drilling rig (rig flor). My roles and tasks include contributing to reducing work risks and accidents through the stop card principle. I must also respect working hours, discipline and show a sense of responsibility and teamwork while performing my duties and work. It is also my duty to contribute to the prosperity of the company I work for.

PTW/h2s/jsa/.....
