## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

? Direct and Supervise operations at the rig site to ensure they are performed In accordance with Company requirements and without accidents of any kind. In particular ensure that the operations are conducted with efficiency and safely in compliance with the approved drilling or work over program, the Drilling Reference Manual ORM, and that all rig site personnel are aware of and adhere to these requirements. ? Resolve operational problems as they arise within the framework of the Company policies and standards, and ensure that non-routine or unforeseen activities are always meticulously planned and organized to identify potential hazards and to mitigate risks. ?. Manage the bi-weekly BOP pressure and function test, and sign-off the test record and pressure charts. Verify the correct BOP certification is available at the rig site, to ensure the Integrity of this critical equipment in accordance with Company standards. ? Manage rig operations by planning and prioritizing activities, and making written instructions for the Drilling Contractor OIM and service Company representatives, to ensure that the program objectives are achieved in an efficient and timely manner and within budget. Provide written handover to back-to back DSV and maintain a record of lessons learned and improvement opportunities, to facilitate continuous performance improvement. ? Supervise and monitor all Company Contractors involved in the rig operations, to ensure a high quality of work is performed in accordance with Company requirements. This shall include assessing and documenting service quality, verifying certification, and compliance documents for all equipment and chemicals delivered to the rig site. ?. Monitor, train and support new graduate engineers. This shall include assigning specific tasks to broaden the learning process to ensure effective on-the-job training and development. ? Manage HSE at the rig site as the highest priority by demonstrating visible HSE leadership and an unrelenting commitment to a safe working environment. This shall include: Participating in the Drilling Contractors STOP program to identify unsafe conditions or procedures, performing at least one full STOP walkabout per week and encouraging active participation by all Service Company personnel in the STOP program to eliminate accidents before they occur.
