Secondary Language	
Total Years of Experience	27

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

Working as a professional within the oil and gas offshore industry for over 27 years, I have made significant contributions as a Driller ,TP, NTP and recently as ARS demonstrating leadership qualities which are effective in a pressurized environment. During this I have prioritized safety and ensured it to be maintained at all times. Throughout my career, I have met and exceeded all objectives put before me by applying my ongoing professional development and my proven expertise. In my current role as ARS, I am responsible for directing all operations on the rig floor, liaising with all rig personnel whilst also mentoring and supervising the local crews on board the platform. I am dedicated to partnering with a team with the same passion for growth and success within the oil and gas industry which share the core values of: believing in health and safety; valuing all people; environmental stewardship and business integrity. I have the experience required and I would very much like the opportunity to discuss, in person, how I can meet the demands of this role to advance the current operation. Senior on site Supervisor who has overseen a 2 year reactivation project into a 2 year drilling campaign. Highly motivated safety conscious individual who can keep a calm head under pressure and able to manage effectively multi cultural workforces delivering high quality results. Just been part of one year hurt free days and also KCAD rig of the year 2024.

IWCF Surface Level 4
Well Control valid until
March 2026 Current
Offshore Survival
Certificate Current
Medical Certificate
