**Subject: Application for the Position of Maintenance Engineer / E&I Planner**

Dear Hiring Manager, I am writing to express my interest in the Maintenance Engineer or E&I Planner position at your company. With over thirteen years of professional experience in the Oil & Gas sector, I bring a strong technical background and proven expertise in electrical and instrumentation maintenance, rotating equipment, and supply chain coordination. In my current role at ENI, Equinor, and Sonatrach, I am responsible for planning and executing preventive and corrective maintenance activities on major equipment including GE turbines (MS 5001/5002), compressors, turbo-expanders, and generators. I have developed strong capabilities in maintenance management systems (MAXIMO), procurement processes, and multi-department coordination for shutdowns and turnaround inspections (TARs). I am also certified in ATEX inspection (Levels 1 & 2 – TUV & INERIS) and have hands-on experience with DCS, TMR, and PLC systems such as Siemens Step 7 and RS-Logix 5000. My background also includes instrumentation repair, loop testing, analyzer maintenance, and strict adherence to HSE standards. I am a disciplined, self-motivated professional with strong problem-solving skills and the ability to work effectively under pressure in multinational teams. My fluency in Arabic, French, and English allows me to work in diverse and international environments. I am confident that my experience and qualifications align well with your needs, and I would welcome the opportunity to contribute to your team's success. I am available for international assignments and open to relocation. Thank you for considering my application. I look forward to the opportunity to discuss how I can support your maintenance and operations goals. Sincerely,

CMMS MXIMO,  
MS project,  
Primavera P6
