I have to know how to manage crew how to do work in critical condition. I have knowledge about safety procedures and work permit. I have knowledge about maintenance of mud pumps agitator tanks shelshekers . When we start any job first safety man give as safety precision and tell us about safety and safe work procedure and tell us about ppe which we your for this task and after that we do TBT in TBT we discuss about jobs hazards and how to safe from these kind of hazard for example we have some job at work at height so there fall drop and trip hazard so we advice use safety harness and anchor safety harness at safe anchor point to avoid fall drop trip hazard.after we divide work with person for example give different task to different worker some person arrange tools some person house keeping some one preparation of paper work ect work permit TBT JSA Checklist and take signature from responsible person and then we start job because safety is our first priority after finish job close permit and do house keeping and start normally work.

I have lifting supervisor certificate because rig move time I lead my crew from front I have knowledge about computer Ms Word Ms excell instal window And I have all courses which we need in oil field h2s haze come firfighting work at height ect
