ALIALSAKHIN@GMAIL.COM Dear Hiring Manager, I am writing to express my interest in the Crane Operator position. With over six years of hands-on experience in offshore and onshore crane operations within the oil and energy sector, and certifications from Saudi Aramco, I am confident in my ability to contribute to your team. My track record of operating cranes for major projects, coupled with my commitment to safety and operational efficiency, aligns with the high standards of drilling rigs. In my most recent position with Saudi Arabian Kentz Co. Ltd., I operated cranes for construction, pipeline, and refinery projects, adhering to strict safety protocols and minimizing downtime through proactive maintenance. I have also worked as a Crane Operator and Supervisor with ARO Drilling, where I managed offshore crane operations during oil and gas drilling, ensuring seamless and incident-free heavy lifting tasks. My key qualifications include: Extensive experience with pedestal cranes (55T, 100T, 500T), crawler cranes, and TADANO RT cranes. Rigger 3 and LOLER Stage 1, 2, and 3 certified, with a deep understanding of safety standards such as API RP 2D and OPITO. A proven ability to lead teams and maintain operational safety under pressure, having managed heavy lifting operations with zero safety incidents across multiple projects. I am excited about the opportunity to bring my skills to drilling rigs, and I am confident that my experience, technical knowledge, and commitment to operational safety will make me a valuable addition to your team. I would welcome the opportunity to further discuss how I can contribute to the success of your projects. Thank you for considering my application. I look forward to the possibility of contributing to your organization and am available at your convenience for an interview. Sincerely, Ali Haider Alsakhin

Extensive experience with pedestal cranes (55T, 100T, 500T), crawler cranes, and TADANO RT cranes. Rigger 3 and LOLER Stage 1, 2, and 3 certified, with a deep understanding of safety standards such as API RP 2D and OPITO.ETC
