Industry	Drilling / Rig
Sub Industry	
Nationality	Egypt
Primary Language	Arabic,
Secondary Language	English,
Total Years of Experience	35

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

I am writing to express my strong interest in the Rig Manager / Rig Superintendent (Onshore) role within your drilling operations team. With over three decades of hands-on experience in the Middle East and North Africa (Egypt, Saudi Arabia, UAE, Kuwait, Iraq, and Algeria), I bring a proven track record in managing full-cycle land drilling operations across a wide range of rig types and complex well programs under LSTK and DTL contractual frameworks. My technical competencies span rig commissioning, Pre-Commissioning, FAT, rig acceptance, rig operational audits, rig start-up, and post-upgrade reactivation. I have successfully managed and operated rigs from 1000 HP to 3000 HP in addition to Rig Move Skills, ranging from conventional mechanical rigs to the latest fully automated cyber systems (Amphion, Omron). I am fully proficient in VFD, SCR, Compound, and Gold Pass power systems and have overseen operations using advanced equipment such as Varco & Canrig top drives, Tesco casing running tools, pipe racking systems, and RST elevators. As Rig Superintendent, I have implemented and supervised rig maintenance programs (PMS), budget allocation and tracking, API-based rig inspection planning, and HSE management system enforcement. I've led well control planning and incident investigations and provided guidance to senior rig site personnel during critical operations. I am also certified in advanced well control and am medically fit and available for immediate deployment. My leadership style is grounded in technical integrity, calm and decisive action under pressure, cross-cultural communication, and a performance-driven mindset. I also work as a freelance Rig Coach and Rig Inspector, which has further enhanced my knowledge of rig audit processes, performance benchmarking, and operational readiness assessments. Please find my updated CV attached for your review. I would welcome the opportunity to discuss how my background and skills can support your team's operational goals and uphold the highest standards of safety, efficiency, and technical excellence. Thank you for considering my application.
