Salary (in USD)	500/Per Day
Industry	Drilling / Rig
Sub Industry	Rig Manager
Nationality	Egypt
Primary Language	English, Arabic,
Secondary Language	English,
Total Years of Experience	5

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

As a Floorman on oil rigs, my main responsibility was to support drilling operations by handling tools and equipment on the rig floor. I worked directly under the supervision of the Driller and Assistant Driller. I was responsible for making up and breaking out drill pipes, casing, and tubulars using tongs, slips, elevators, and power tools. I followed instructions carefully and ensured each operation was done safely and efficiently. One of my daily tasks was keeping the rig floor clean and free of hazards to maintain a safe working environment. I participated in rig-up and rig-down activities and assisted with pipe handling during tripping in and out of the hole. I also helped load and offload equipment, move materials, and provide general support to other team members such as Derrickman and Roustabout. Safety was always a top priority. I wore proper PPE at all times and followed all safety procedures, including reporting near misses and unsafe acts. I participated in safety meetings, toolbox talks, and regularly performed hazard identification. The job required strong physical stamina, teamwork, and alertness. I worked long shifts in both land and offshore environments. My experience as a Floorman gave me valuable knowledge about drilling operations, equipment handling, and oilfield safety practices, which I am ready to apply in my next role.

Strong knowledge of rig floor operations and TRS tools. with power tongs, slips, elevators, and spinning wrenches. • Ability to work under pressure and in extreme ? • BOSIET certified (Basic Offshore Safety Induction and Emergency Training).
