----------------------------	---------------------------------

Perform routine slickline operations including setting and retrieving plugs, gauges, and valves as per operational requirements. Conduct operations in compliance with safety procedures, operational procedures, and customer requirements. Conduct pre-job inspections and maintenance of slickline equipment and tools, ensuring all tools and equipment are in proper working condition. Troubleshoot and repair slickline equipment and ensure all tools are properly calibrated and ready for use. Follow all safety guidelines, risk assessments, and regulatory requirements during slickline operations. Participate in pre-job safety meetings (JSA) and ensure all crew members are briefed on safety protocols before starting operations. Ensure that all slickline operations are conducted safely and in compliance with HSE standards to minimize risk to personnel and the environment. Provide technical support during slickline operations by performing diagnostics and addressing technical issues in real time. Complete and maintain accurate operational reports, including job summaries, equipment logs, and incident reports. Record and report any issues or abnormalities during operations and recommend corrective actions.
