----------------------------	---------------------------------

Plan, execute, and supervise cased hole and open hole wireline operations, including PLT, TCP, WCP, and cement evaluation. Ensure safe and efficient handling of explosive and radioactive tools, maintaining 100% regulatory and QHSE compliance. Conduct pre-job risk assessments, tool calibration, and QA/QC checks to guarantee job readiness. Lead field crews during rig and rigless interventions, ensuring flawless operational execution and client satisfaction. Perform real-time data acquisition and interpretation using Warrior, Eclipse, and Maxwell platforms for accurate decision-making. Manage pressure control equipment (PCE) operations for HPHT wells, ensuring adherence to IWCF and API RP 67 standards. Oversee tool maintenance and troubleshooting, minimizing equipment downtime and preventing job delays. Collaborate with drilling, completion, and production teams to design and execute optimal well intervention programs. Deliver post-job analysis and technical reports, highlighting operational performance and recommending improvements. Mentor junior engineers and operators, fostering continuous learning and skill development.
