

FALCON®
MULTI SERVICES LTD

Falcon Multi Services Ltd

201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	3665
Name	Fatma Zohra Bouhadda
Date of Birth	1998-03-13
Salary (in USD)	1000/Per Month
Industry	Engineering & Science
Sub Industry	
Nationality	Algeria
Primary Language	English, French, Arabic,
Secondary Language	Spanish ,
Total Years of Experience	4

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

As a Wireline Logging Field Engineer, my primary responsibilities involve the deployment, operation, and maintenance of various cased-hole logging tools, including CBL (Cement Bond Logs), MIT (Mechanical Integrity Tests), MTT (Multi-Tool Tests), and PLT (Production Logging Tools). I am responsible for ensuring that all tools are properly calibrated and fully operational before and during field operations to guarantee accurate and reliable logging data. This involves performing pre-job checks, troubleshooting equipment issues, and conducting routine maintenance and servicing to maximize tool lifespan and performance. In addition to field operations, I actively contribute to the planning and design of logging programs, including data acquisition strategies and well-specific logging procedures. I am proficient in using AutoCAD for designing and reviewing schematics related to tool assemblies, wellsite setups, and data interpretation layouts. I also implement modern digital technologies, such as 3D printing for rapid prototyping of parts and components, as well as predictive maintenance sensors to monitor equipment health, minimize downtime, and enhance operational efficiency. Collaboration and communication are key aspects of my role, as I work closely with engineering, operations, and HSE teams to ensure compliance with safety standards and operational procedures. Through meticulous planning, technical expertise, and continuous adoption of digital solutions, I contribute to the optimization of wireline operations, ensuring accurate logging results, efficient workflows, and reliable well data for reservoir evaluation and production optimization.

HSE , Maintenance ,
Electronics and
electrical engineering,
communication,
Autocad designing

Education Summary

Course	University	Passing Year	Country
Electrical and Electronics	IGEE ex INELEC	2020	Algeria

Career Summary

Position	Employer	Country	From	To
Operations Engineer	Nimr& tgt	Qatar	02/2024	10/2025
