Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

As a Slickline Operator, I am responsible for executing well intervention and maintenance operations using slickline equipment in oil and gas wells. My key duties include preparing and maintaining slickline tools, pressure control systems, and surface equipment to ensure safe and efficient performance. I conduct various downhole operations such as setting and retrieving plugs, running gauges and valves, and performing depth correlation and well integrity checks. I ensure that all tasks are carried out in strict compliance with company safety policies, operational procedures, and environmental regulations. I collaborate closely with field supervisors, engineers, and other team members to deliver high-quality results according to client requirements. My role also involves inspecting and maintaining tools, managing inventory, and ensuring all equipment is properly calibrated and in optimal working condition. Accurate job reporting, data recording, and clear communication are essential aspects of my daily responsibilities. Through technical expertise, attention to detail, and a strong commitment to safety, I contribute to the overall success of well operations and production efficiency.

i can multitasking .
