Industry	Drilling / Rig
Sub Industry	
Nationality	Pakistan
Primary Language	English,
Secondary Language	English,
Total Years of Experience	4

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

With 4 Years of Experience in Oil & Gas, I have worked extensively on ADNOC Onshore Drilling Rigs, Experienced Oil & Gas Supervisor with a strong background in production site operations, drilling, and maintenance. Skilled in managing rig floor activities, supervising crews, and ensuring compliance with HSE standards. An oil and gas site supervisor is responsible for overseeing daily operations at a worksite to ensure safety, efficiency, and high-quality performance. This role involves managing personnel, coordinating tasks, monitoring equipment, and ensuring all work activities follow company standards and industry regulations. Supervisors play a critical role in maintaining a safe environment, especially in high-risk areas where heavy machinery, hazardous materials, and pressurized systems are used. A site supervisor must plan work schedules, assign responsibilities, and verify that all workers are trained and competent for their tasks. They also conduct regular safety meetings, perform inspections, and enforce compliance with safety procedures such as PPE use, permit-to-work systems, and emergency protocols. Identifying hazards early and taking corrective action are essential parts of the job. Communication is a key skill, as the supervisor acts as a link between management, contractors, and field workers. They must report daily progress, document incidents, and ensure that operations stay within budget and meet project timelines. Strong problem-solving skills are also important, as unexpected challenges often arise in the field. Overall, an oil and gas site supervisor ensures that operations run smoothly, safely, and efficiently, contributing to the success of the project and the protection of all personnel on-site.

H2S Awareness ?
Rigging and Slings ?
PPE ? BBS ? Authorize
Gas testing ? Confined
space ? Advance First
aid ? Basic Fire fighting
? Working at height
