Sub Industry	Rig Manager
Nationality	Pakistan
Primary Language	English,
Secondary Language	Hindi,
Total Years of Experience	7

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

Got it — you want your work duties converted into a 200-word description. Here's a clean, professional 200-word version based on what you shared: --- I am responsible for ensuring the smooth and continuous operation of all mud pumps and mud-processing equipment on the rig. My work involves performing routine maintenance, troubleshooting mechanical issues, and carrying out timely repairs on GD, National, and Cameron mud pumps to ensure optimal performance during drilling operations. I maintain all mud-processing areas in clean, organized, and safe conditions, supporting both efficiency and rig safety standards. A key part of my role includes assisting with Run in Hole (RIH) and Pull out of Hole (POOH) operations, as well as working on the monkey board and supporting the derrickman when required. I also help with the installation, movement, and handling of BOP equipment, ensuring that all critical components are positioned and operated safely. On a daily basis, I inspect rig-floor handling equipment, perform necessary repairs, and verify that all tools and machinery are functioning properly. I also oversee the maintenance and reliability of various drilling equipment across the rig. Regular safety checks—such as inspecting the safety valve—are an essential part of my responsibilities, helping to maintain a safe working environment and preventing operational hazards. --- If you want, I can also make it more catchy, more technical, or more simple.
