

FALCON®
MULTI SERVICES LTD

Falcon Multi Services Ltd

201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	4349
Name	Ahmed Mohamed Ahmad
Date of Birth	1990-08-30
Salary (in USD)	1900/Per Day
Industry	Drilling / Rig
Sub Industry	Rig Manager
Nationality	Egypt
Primary Language	English, Arabic,
Secondary Language	English, Arabic,
Total Years of Experience	6

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

Lifting and cementing operations are essential elements in drilling activities and require strict control, proper planning, and continuous monitoring to ensure safety and efficiency on the rig. **Lifting operations** begin with thorough pre-planning that includes assessing the load weight, size, and center of gravity, then selecting the appropriate lifting equipment such as cranes, slings, shackles, or chains. Before starting the lifting process, all lifting gear must be inspected for defects and verified for valid certifications. During the lift, a qualified rigger and lifting supervisor must coordinate using standard hand signals or radio communication. The area must be barricaded, and no personnel should stand under suspended loads. Monitoring weather conditions and ensuring the Safe Working Load is not exceeded are also critical. After the operation, equipment is stored properly and the job is documented for future improvement. On the other hand, **cementing operations** focus on maintaining well integrity. Preparation starts with reviewing the cementing program, ensuring the readiness of pumps, mixers, cement, and additives. The wellbore must be conditioned, and plugs installed before pumping begins. During cementing, the cement slurry must be mixed according to required specifications, and the pumping rate and pressure must be continuously monitored to detect any abnormalities such as losses or plugging. After the job, the plug is bumped, cement is allowed to set (WOC), and pressure tests may be performed to verify casing integrity. Detailed documentation follows to confirm that the cementing objectives have been achieved. Together, these operations play a crucial role in maintaining safety, structural stability, and operational efficiency in drilling environments.

Fai faiting T.Bosit Asst
crane operator (Level
2) Hoit Emergency
Response team member
Working at heights
Confined Space Lifting

Education Summary

Course	University	Passing Year	Country
Computers and Information Systems	Helwan university	2013	Egypt

Career Summary

Position	Employer	Country	From	To
Roustabout	EDC	Egypt	01/2016	11/2025
