## Personal Information

Candidate id	4594
Name	Muhammed Risvan
Date of Birth	1995-04-03
Salary (in USD)	1500/Per Month
Industry	Maritime
Sub Industry	
Nationality	India
Primary Language	English,
Secondary Language	Hindi,
Total Years of Experience	10

## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

A Mechanical Supervisor oversees mechanical operations, installation, maintenance, and repair activities in industrial, construction, or plant environments. The role involves planning daily mechanical tasks, allocating manpower, and ensuring timely execution of work schedules. They supervise teams of technicians, mechanics, foremen, and contractors, providing technical guidance and monitoring performance to maintain productivity. The supervisor interprets mechanical drawings, blueprints, P&IDs, equipment manuals, and specifications to ensure correct implementation. They inspect and monitor the installation and maintenance of mechanical systems such as pumps, motors, compressors, valves, heat exchangers, piping networks, and rotating or static equipment. Ensuring proper alignment, assembly, torque tightening, lubrication, calibration, and operational testing is part of routine responsibilities. Quality control is critical; hence, they coordinate with QA/QC teams for testing and commissioning, including hydrostatic, pneumatic, pressure tests, and NDT compliance when required. Safety is a major priority, and the supervisor enforces safety rules, PPE usage, lock-out/tag-out procedures, and conducts toolbox talks to reduce workplace hazards. They ensure safe operations and housekeeping standards across work areas. Additionally, they manage mechanical materials, spare parts, and tools, verify inventory, and report shortages. They prepare daily or weekly reports on progress, breakdowns, incidents, and downtime analysis. Troubleshooting mechanical faults, implementing preventive maintenance plans, maintaining maintenance logs, coordinating with cross-functional teams, and supporting vendor or service engineer activities are also essential duties in ensuring smooth mechanical performance with minimal downtime.
