Total Years of Experience	14

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

With over 15+ years of progressive HSE leadership experience across oil, gas, workovers, logistics and high-risk industrial environments, I bring a strong capability to lead HSE strategy, embed a positive safety culture, and maintain ISO-certified HSE Management Systems aligned with international best practice. Throughout my career, I have consistently led organizations toward the objective of zero harm to people, the environment and assets. I have developed and executed HSE departmental strategies, annual plans and performance KPIs, supported by robust reporting, trend analysis and continuous improvement initiatives. My experience aligns closely with the requirements of maintaining top-quartile HSE performance, including oversight of occupational and process safety indicators, incident statistics, audit close-out and workforce competency assurance. I possess strong expertise in risk management and process safety, having directed and participated in HAZID, HAZOP, PHA, QRA and SIMOPS risk assessments to ensure hazards are identified, assessed, communicated and effectively controlled. I have led the development of Safe Work Plans, procedures and equipment specifications to mitigate risks to personnel, the environment, company assets and reputation. Environmental stewardship has been a core element of my leadership roles. I have managed environmental impact assessments, chemical management, spill control, and waste management, while maintaining effective liaison with regulatory authorities and stakeholders. I have successfully led and sustained ISO 14001 and ISO 45001 certification, ensuring alignment with corporate standards and regulatory requirements. I am experienced in emergency preparedness and response, including development of Emergency Response Plans, coordination with external stakeholders, delivery of emergency drills and exercises, and provision of leadership during incident command scenarios. I have also led incident investigations using TapRoot® Root Cause Analysis, ensuring lessons learned are communicated and corrective actions are implemented to prevent recurrence. As a people leader, I have managed multi-disciplinary HSE teams, set clear objectives, developed competency frameworks and training matrices, and fostered strong workforce engagement through Behavioral-Based Safety and safety leadership programs. I am comfortable working with senior leadership, regulators, contractors and external authorities, and I bring strong communication and presentation skills. I am highly motivated to contribute my experience, leadership and technical expertise to support your organization in achieving HSE excellence, regulatory compliance and continuous improvement. I would welcome the opportunity to further discuss how my background aligns with your HSE objectives. Yours sincerely, Muhammad Faisal

- NEBOSH International General Certificate (IGC) • Adept at Systems : ISO 9001, ISO 14001, ISO 45001 • TapRoot® Advanced Root Cause Analysis – Team Leader • IADC Rig Pass • H2S Awareness & Breathing Apparatus • Confined Space Entry & Rescue
