<b>Primary Language</b>	English,
<b>Secondary Language</b>	English,
<b>Total Years of Experience</b>	20

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Please find my CV attached. I am a Chief Engineer with 20 years of sea-going experience, including the last 8 years on PSV and AHTS vessels operating in demanding offshore environments. During my career I have been responsible for engine room operations, power generation, planned maintenance systems, troubleshooting under load, and safe daily operations with strong focus on reliability and efficiency. I have worked on various vessel types and with multinational crews, often in Africa and other challenging regions, which has strengthened my adaptability and problem-solving skills. I am now looking to transition onto more advanced offshore units such as jack-up rigs, where I can further develop my career in a more stable operational environment focused on power generation, maintenance and safety-driven procedures. I fully understand the differences between marine vessels and drilling units and I am prepared to adapt to rig-specific systems, procedures and reporting structures. I am open to accepting a lower position if required (maintenance engineer, rig mechanic or assistant engineer) in order to gain rig experience and build long-term cooperation with the company. I am available for regular or relief contracts and can adapt to various rotation schedules. I consider myself reliable, safety-oriented and committed, with a long-term mindset and strong work ethic. I am confident that my experience, maturity and motivation would allow me to contribute positively to the team and operations from the first day on board.

Kind regards, Lukas

Strong ETO skills  
Bosiet/huet all stcw
