Industry	Drilling / Rig
Sub Industry	Control Room Operations
Nationality	India
Primary Language	English,
Secondary Language	
Total Years of Experience	16

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

With over a decade of hands-on experience in offshore drilling operations across the Middle East and Southeast Asia, complemented by a solid educational background in Electrical and Electronics Engineering and an MBA in Oil and Gas Management, I am confident in my ability to contribute effectively to your team. In my current role at ADES - Advanced Energy Systems, I have successfully delivered shipyard projects on time and within budget, overseeing major overhauls and ensuring compliance with stringent audit requirements. My technical acumen and managerial expertise have been instrumental in liaising with vendors, developing critical spares lists, and managing inventory on the EAM system. Previously, as a Fleet Maintenance Superintendent at Northern Offshore Ltd, I was responsible for the maintenance activities and operations management of high-spec Amphion drilling rigs. My proactive approach to maintenance management systems and continuous improvement initiatives, using Six Sigma and Kaizen techniques, has significantly enhanced operational efficiency and reduced downtime. My technical responsibilities have always been underpinned by a strong commitment to safety and quality. I have improved the function and reliability of rig systems by ensuring adherence to safety protocols and implementing risk mitigation measures. My experience with Electrical maintenance, PLCs, DCS, VFDs, and automation systems has equipped me with the skills necessary to troubleshoot and maintain complex drilling equipment effectively. Thank you for considering my application. I am looking forward to the opportunity to discuss how my experience and skills align with the needs of your team. Please find my resume attached for your review.
