

Falcon Multi Services Ltd
201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	7024
Name	Baharuddin Mallick
Date of Birth	1987-10-06
Salary (in USD)	100/Per Day
Industry	Maintenance & Inspection
Sub Industry	NDT Technician
Nationality	India
Primary Language	English,
Secondary Language	Hindi,
Total Years of Experience	11

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

Executed SAP PM/CMMS functions including work order and notification creation, confirmation, closure, material reservations, PR creation, goods issue/posting, and SES processing. • Planned and tracked daily mechanical maintenance materials, coordinating with procurement, warehouse, and third-party vendors to support preventive, breakdown, and shutdown maintenance. • Prepared detailed maintenance work packages with job steps, tools, spare parts, and safety requirements, logged maintenance activities and monitored spare parts usage in SAP. • Performed mechanical maintenance including replacement and repair of bearings, seals, gaskets, plugs, power transmission gears, V-belt drives, and rotary/stationary blades on granulation, extruder, and grinder equipment. • Dismantled, overhauled, reassembled, and aligned adaptors, cardan shafts, DPET lines, edge trim cutters, and extruder grinders to restore equipment reliability. • Conducted routine inspections, vibration analysis, and condition monitoring for pumps, motors, gearboxes, and rotating equipment; installed and maintained firefighting systems including hydrants, sprinklers, and diesel pumps. • Assisted in inspection, maintenance, troubleshooting, alignment, and installation of rotary and static equipment, including pumps and heat exchangers. • Supported shutdown and turnaround activities with hands-on experience in mechanical seals, bearings, couplings, and lubrication systems. • Ensured proper torquing, gasket fitting, and flange management during equipment assembly and reassembly. • Performed preventive maintenance tasks, including lubrication and cleaning of machine and equipment. • Dismantled machines, equipment, or devices to access and remove and defective parts. • Maintained accurate records of all maintenance activities performed. • Installed, aligned, and commissioned motors, centrifugal and vertical pumps, and other rotating equipment. • Performed precision shaft alignment using laser alignment tools and dial indicators, correcting angular and parallel misalignment by using dial gauge, vernier caliper, micrometer, depth gauge, filler gauge spirit level. • Conducted soft foot inspection and ensured alignment within manufacturer tolerances for smooth operation. • Carried out bearing replacement, mechanical seal installation, and coupling alignment during preventive and breakdown maintenance. • Used precision measuring tools and maintained proper alignment reports while following safety and shutdown procedures.
