## Personal Information

<b>Candidate id</b>	7212
<b>Name</b>	Aminu Jibril
<b>Date of Birth</b>	1998-11-02
<b>Salary (in USD)</b>	2000/Per Month
<b>Industry</b>	Drilling / Rig
<b>Sub Industry</b>	Company Man
<b>Nationality</b>	Nigeria
<b>Primary Language</b>	English,
<b>Secondary Language</b>	
<b>Total Years of Experience</b>	3

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Executed offshore pipeline composite repair works in strict accordance with approved procedures, client specifications, and applicable international standards such as ISO and ASME requirements. Actively supported the full repair lifecycle, including site assessment, surface preparation, composite material mixing and application, curing monitoring, and post-repair inspection activities. Ensured that all substrates were properly prepared through grit blasting and mechanical cleaning to achieve the required surface profile and cleanliness standards prior to composite wrap installation. Assisted in the accurate measurement, cutting, and installation of composite materials, maintaining proper resin ratios and application techniques to guarantee structural integrity and long-term performance of the repaired sections. Maintained detailed documentation of repair activities, material usage, environmental conditions, and inspection results to ensure traceability and compliance with project quality plans. Worked closely with quality control personnel to verify that each repair met specified acceptance criteria before handover. Demonstrated strong attention to detail in identifying potential defects, irregularities, or safety risks during operations and promptly reported findings to supervisors for corrective action. Collaborated effectively within a multidisciplinary offshore team comprising engineers, technicians, safety officers, and client representatives to ensure smooth workflow and timely project completion. Strictly adhered to all Health, Safety, and Environment (HSE) policies, including permit-to-work systems, toolbox talks, risk assessments, and the proper use of personal protective equipment (PPE). Consistently promoted a safety-first culture while delivering high-quality composite repair solutions in challenging offshore environments.
