-----------------------------------	--

Motivated and detail-oriented Drilling & Workover Engineer with over 13 years of comprehensive experience in complex well operations across both offshore and onshore environments. My expertise spans workover operations, fishing, subsea interventions, HP-HT wells, TCP-DST well testing, hydro and acid fracturing, and advanced smart well completions integrated with ESP and SRP systems. I have hands-on operational exposure on Drill Ships, Semi-Submersible rigs, Jack-up rigs, and 150-ton onshore workover rigs, enabling me to adapt seamlessly to diverse operational challenges and environments. Throughout my career, I have successfully planned and executed technically demanding well programs while maintaining strict adherence to HSE standards and regulatory compliance. I specialize in diagnosing downhole challenges, optimizing well performance, minimizing non-productive time (NPT), and implementing cost-effective engineering solutions. My involvement in HP-HT and subsea operations has strengthened my ability to manage high-risk wells with precision, ensuring well integrity and operational safety at every stage. I have a proven track record of applying advanced engineering techniques and real-time operational analysis to enhance drilling efficiency, improve completion design, and maximize reservoir productivity. By combining technical expertise with strong leadership and collaborative teamwork, I consistently contribute to successful project delivery, operational excellence, and sustainable asset value enhancement.
