## Personal Information

<b>Candidate id</b>	8194
<b>Name</b>	Abdessamed Zerroune
<b>Date of Birth</b>	1986-11-04
<b>Salary (in USD)</b>	5000/Per Month
<b>Industry</b>	Production
<b>Sub Industry</b>	
<b>Nationality</b>	Algeria
<b>Primary Language</b>	Arabic,
<b>Secondary Language</b>	English,
<b>Total Years of Experience</b>	15

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Highly experienced Well Integrity and Well Intervention Engineer with nearly 15 years of experience in the oil and gas industry and a valid IWCF Level 4 certification. Throughout my career, I have developed extensive expertise in well operations, well intervention, well remediation, and production optimization through reservoir stimulation, supported by strong technical knowledge in advanced well integrity engineering and well lifecycle management. I began my early career in field operations, supervising various well intervention activities including slickline, wireline, coiled tubing, and hydraulic fracturing operations. This hands-on operational experience provided me with a strong understanding of wellsite execution, operational safety, and the technical challenges associated with intervention and production enhancement activities. After approximately four years in intervention supervision roles, I transitioned into a Well Integrity Engineer position, where my focus shifted more toward engineering analysis, well diagnostics, and long-term well integrity management. In this role, I have been actively involved in well integrity assessments, failure analysis, well repair design, and integrity risk evaluations, ensuring compliance with industry standards and best practices. I have gained solid experience working with sweet and sour wells, as well as HPHT (High Pressure High Temperature) wells, addressing complex integrity challenges and implementing effective remediation solutions. Additionally, I have extensive experience working across the MENA region, collaborating with multidisciplinary teams in multicultural environments. I am recognized for my ability to integrate operational experience with engineering expertise to deliver safe, efficient, and technically sound well integrity and intervention solutions.

IWCF L4

## Education Summary

Course	University	Passing Year	Country
Drilling & Well Engineering	robert Gordon University	2026	United Kingdom
Master hydraulic engineering	Mohamed khaidr biskra	2019	Algeria
Pertoleum engineering Drilling	University of ourgla-Algeria	2009	Algeria

## Career Summary

Position	Employer	Country	From	To
Wellhead And Well Integrity specialist	Anton oil DMCC	Iraq	04/2024	03/2026
Well Integrity and Intervention Engineer	SH-ENI	Algeria	05/2011	04/2024
