-----------------------------------	--

Frac Sr operations ., The main responsibility of the frac operations team is to help increase the production of oil and gas from underground reservoirs using hydraulic fracturing techniques. One of the main responsibilities is preparing the equipment before starting the job. • must check pumps, blenders, tanks, and high-pressure lines to make sure everything is working properly and safely. Proper preparation helps avoid problems during the operation. Another important responsibility is mixing and pumping the fracturing fluid. The fluid usually consists of water, sand, and chemicals. Monitoring the operation responsibility. Operators must watch the pressure levels, pumping rate, and fluid volumes during the job to ensure the process follows the engineering design. Safety is one of the most important responsibilities in frac operations. Workers must follow all safety rules, wear personal protective equipment (PPE), and communicate with supervisors and engineers. After the operation is completed, the team is responsible for cleaning the equipment, performing maintenance, and recording data about the job.
