Coiled Tubing Senior Operator with hands-on experience in well intervention operations within the oil and gas industry. Experienced in performing coiled tubing operations including clean-out, nitrogen lifting, matrix acidizing, fishing, milling, kick-off operations, sand plug clean-out, and post-fracturing well intervention activities. Skilled in operating Hydra Rig coiled tubing units and injector heads such as HR580, HR660, and HR680 with different tubing sizes. Strong background in rig-up and rig-down of coiled tubing equipment including reel, injector head, gooseneck, hydraulic power pack, BOP stack, stripper, and pressure control equipment. Experienced in conducting pressure testing, function testing, depth correlation, and monitoring weight and well parameters to ensure safe and efficient operations. Familiar with wellhead equipment, Christmas tree configurations, and barrier management practices during live well intervention operations. Previously worked as a Cementing and Stimulation Operator where I gained experience operating high-pressure pumping units, nitrogen pumping equipment, and data acquisition systems such as JDAS and SJS. Experienced in pumping treatment fluids according to engineering programs, monitoring pressures and rates in real time, and performing rig-up of surface iron and pumping manifolds. Holds a Bachelor's degree in Mechanical Engineering and an IWCF Level 4 certification in Well Intervention (Coiled Tubing). Committed to maintaining high HSE standards, conducting Job Safety Analysis (JSA), participating in toolbox talks, and ensuring safe job execution in challenging field environments. Available for rotational assignments and international operations.
