<b>Primary Language</b>	Arabic,
<b>Secondary Language</b>	English, French,
<b>Total Years of Experience</b>	10

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

I am a multidisciplinary professional with a diverse skill set spanning technical engineering, digital systems, business development, and creative communication. My expertise includes natural gas network design and planning, where I contribute to the development and optimization of infrastructure projects through structured analysis, technical documentation, and strategic planning. Alongside my engineering competencies, I have strong experience in Information Systems administration and troubleshooting. I am skilled in diagnosing technical issues, maintaining system reliability, and ensuring that digital environments operate efficiently to support organizational objectives. My background in communication and marketing allows me to bridge the gap between technical solutions and real-world users. I understand how to present complex ideas clearly, build strong messaging, and support brand or project visibility through strategic communication. In addition, I bring practical expertise in negotiation and sales, enabling me to identify opportunities, build partnerships, and drive value through effective client engagement and solution-oriented discussions. I also work with mapping and Geographic Information Systems (GIS) to analyze spatial data and support planning, infrastructure deployment, and geographic decision-making. Beyond my technical and business skills, I practice photography, a creative discipline that strengthens my attention to detail, visual storytelling, and documentation capabilities. This combination of engineering knowledge, digital expertise, business development, and creativity allows me to approach challenges with a holistic, solution-driven mindset and contribute effectively to multidisciplinary projects.
