Total Years of Experience	8

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

Responsible for supporting and executing coiled tubing well intervention operations in oil and gas wells while ensuring safe and efficient performance according to company and industry standards. Operate and assist in running 2-inch coiled tubing strings in vertical and horizontal wells up to significant depths, performing activities such as well cleanout, nitrogen lifting, circulation, and bleed-off operations. Monitor well parameters including pressure, flow rate, and equipment performance during operations to ensure safe working conditions. Assist in rig-up and rig-down of coiled tubing equipment including injector head, BOP stack, control cabin, and pressure control equipment. Conduct equipment inspections and routine maintenance to ensure operational readiness and reliability. Maintain strict compliance with HSE procedures, risk assessments, and safety policies to protect personnel, equipment, and the environment. Communicate effectively with supervisors, crane operators, and other crew members to coordinate lifting and field activities. Identify potential hazards and stop operations if unsafe conditions arise. Support troubleshooting during operational challenges and assist in implementing corrective actions to maintain productivity. Prepare operational reports and document field activities accurately. Contribute to teamwork and continuous improvement by sharing field experience and maintaining high professional standards in all well intervention operations.
