<b>Total Years of Experience</b>	2

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Mechanical Engineer with strong knowledge in mechanical maintenance, troubleshooting, and well control operations. Responsible for supporting maintenance activities, including preventive and corrective maintenance for pumps, engines, compressors, and other mechanical systems to ensure reliable and efficient operation. Experienced in conducting routine inspections, identifying mechanical faults, and assisting in repair, replacement, and calibration of equipment. Skilled in using mechanical tools, following maintenance procedures, and ensuring compliance with safety and operational standards. Work closely with maintenance teams and supervisors to ensure all mechanical systems operate safely and efficiently according to company requirements. Assist in installation, alignment, and testing of mechanical components and support drilling operations by maintaining well control equipment and procedures. Familiar with blowout preventers (BOP), choke manifolds, and pressure control systems to ensure safe and controlled drilling operations. Maintain proper documentation of maintenance and well control activities, report technical issues, and follow HSE regulations in all operations. Able to work under pressure, solve mechanical and operational problems effectively, and support team operations to maintain productivity. Strong teamwork, communication, and problem-solving skills with commitment to continuous learning and improving technical knowledge in mechanical engineering, maintenance, and well control operations.

Mechanical Maintenance  
 Troubleshooting of Pumps and Engines  
 Preventive Maintenance  
 Hydraulic and Pneumatic Systems  
 Basic Knowledge of Drilling Rig Equipment  
 HSE and Safety Awareness  
 Teamwork and Problem Solving
