Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

I have lab specialist and Cementer specialist background when I started in oilfield services. In 1999 I was moved to coiled tubing services in Indonesia. Started from 2005 mainly I spent my career in Saudi Arabia on BJ services then became Baker Hughes. Mostly I got my coiled tubing job experience in Saudi Arabia and a couple years in Oman (Schlumberger). Then after the pandemic I worked in Azerbaijan with Baker Hughes for BP Offshore. I have experiences as Equipment Operator/Coiled tubing supervisor/Coiled tubing field coordinator for Fluid pump, Nitrogen Pump and Coiled tubing unit. - As operator I can do preparation of the equipment, preparing or auxiliary equipment required for job execution and maintenance pre and post job maintenance. - As Field Specialist roles I have responsibility to make sure all equipment required ready, prepared all equipment required on the job, make sure all equipment fit for purpose on the field, communicate with technical and client for the job objective and executed safely and fulfill client expectation. - As Field Coordinator my role is work along with Service coordinator to have flawless job execution in any job. Designated and assigned equipment and crews for each particular job accordingly. Maintain inventory and availability of equipment spare parts to ensure no conflict on operation due to spare part availability. Constantly visiting job site to evaluate field personnel and job performance in terms of safety and quality along with timing efficiency on all job steps and generate improvement steps as a development plan. Maintain and ensure minimum training required is up to date for all crew members in with in service line.

I have experience for all type of basic and complex coiled tubing job including in conjunction with other services such as Frac, Stimulation, Cementing and Logging. Currently I am holding WC IADC . till Dec 2026.
