Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

A Senior Service Supervisor in Frac, Stimulation, and Coil Tubing operations is responsible for planning, supervising, and executing oilfield service operations at the wellsite. This role requires strong technical knowledge, leadership skills, and the ability to manage field crews while ensuring safe and efficient job execution. The supervisor coordinates hydraulic fracturing, well stimulation, and coiled tubing operations according to the approved program and client requirements. They monitor equipment performance, maintain operational efficiency, and ensure all activities comply with company safety standards and industry regulations. A key responsibility is leading field personnel, assigning tasks, and providing technical guidance during operations. The supervisor also communicates directly with clients, engineers, and logistics teams to ensure smooth workflow and timely completion of the job. In addition, the Senior Service Supervisor is responsible for troubleshooting operational issues, maintaining accurate job reports, and ensuring proper maintenance of equipment such as pumps, blenders, coiled tubing units, and pressure control systems. Strong problem-solving skills, operational decision-making, and safety leadership are essential in this role. The position often requires working in challenging environments, managing high-pressure operations, and ensuring the highest standards of safety, quality, and service delivery while meeting project objectives.
