## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Performed preventive, predictive, and corrective maintenance on mechanical equipment and rotating machinery. Inspected, repaired, and overhauled equipment such as pumps, compressors, valves, motors, gearboxes, and hydraulic systems. Diagnosed mechanical faults and implemented effective troubleshooting to minimize equipment downtime. Assisted in the installation, alignment, and commissioning of mechanical equipment and machinery. Conducted routine checks including lubrication, vibration monitoring, and performance testing of equipment. Replaced or repaired damaged components such as bearings, seals, gaskets, couplings, and belts. Read and interpreted technical drawings, P&ID diagrams, and maintenance manuals to perform tasks accurately. Ensured all maintenance work complied with safety standards, company procedures, and HSE policies. Maintained maintenance records, service reports, and equipment inspection logs. Coordinated with other departments and technicians to ensure smooth and efficient plant or rig operations.

- Work Permit Procedure (PTW)
- Urea Reactor and Urea Stripper specialized training
- Heat Exchanger maintenance and testing protocols
- Pressure Vessel and Tank inspection standards
- Piping and Structure Fabrication techniques

## Education Summary

Course	University	Passing Year	Country
Diploma in Mechanical Engineering	Government College of technology	2019	Pakistan

## Career Summary

Position	Employer	Country	From	To
Mechanical Technician	Qatar Energy LNG	Qatar	03/2025	03/2026
