MULTI SERVICES LTD

Falcon Multi Services Ltd

201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	9197
Name	Bryan Chikotora
Date of Birth	1998-12-29
Salary (in USD)	3000/Per Month
Industry	Geosciences
Sub Industry	Geophysicist
Nationality	Zimbabwe
Primary Language	English,
Secondary Language	English,
Total Years of Experience	1

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

In this role, I conduct field investigations to collect rock, soil, and groundwater samples, ensuring accurate geological data collection. I analyze these samples using laboratory techniques and geological software to interpret subsurface conditions and identify valuable resources such as minerals and water reserves. I prepare detailed geological maps, reports, and technical documentation to support project planning and decision-making. Additionally, I assess geological risks, including landslides, erosion, and ground instability, and provide recommendations to ensure safety and sustainability in engineering and construction projects. Collaboration is an essential part of my responsibilities, as I work closely with engineers, environmental scientists, and project managers to deliver effective solutions. I also ensure compliance with environmental regulations and industry standards, promoting responsible resource use and minimizing environmental impact. Furthermore, I stay updated with advancements in geological research and technology to improve efficiency and accuracy in my work. My role is to provide reliable geological insights that support safe development, resource management, and environmental conservation, contributing to the success of projects and long-term sustainability.

I bring a strong combination of technical skills, practical training, and relevant certifications that support effective performance in geological roles. I am proficient in geological mapping, field sampling, and core logging, with hands-on experience gained through academic fieldwork and internships. I have working knowledge of industry standard software such as GIS (Geographic Information Systems), AutoCAD, and basic data analysis tools, which I use to interpret and present geological data accurately. I possess strong analytical and problem-solving skills, enabling me to evaluate geological conditions and contribute to informed decision making. My ability to prepare clear technical reports and communicate findings effectively supports collaboration with multidisciplinary teams. I am also detail-oriented, safety-conscious, and adaptable to working in challenging field environments. In terms of certifications, I am working towards certifications such as First Aid and Health & Safety training, which are essential for fieldwork. I have completed short courses in GIS, environmental management, or mineral exploration, enhancing my practical knowledge. Additionally, I have a valid driver's license and am willing to travel or work on-site as required.

Education Summary

Course	University	Passing Year	Country
Bachelor's of Science in Geology	Parul University	2024	Zimbabwe

Career Summary

Position	Employer	Country	From	To
Student Geologist	Geocon and Associates	India	05/2022	11/2022
