-----------------------------------	--

Working in E and P Company as a Sr Well test Engineer - Budgeting- \$10 Mil, Leading, planning, coordinating- Well testing offshore operations which includes Surface Well testing, Drill stem testing, Sampling, Data acquisition, Perforation, Coil tubing, Cementing, Stimulation services. Participating in HSEIA and giving suggestion to HSE engineer for safe operational procedures and practices. Making sure the well testing procedures are detail oriented and safe. Arranging KOM with the vendors and Service parties to be on the same page and to share the information, progress reports and requirements. make a 200 words para for my job profile, refer this As a Senior Well Test Engineer in an Exploration & Production (E&P) company, I am responsible for managing a well?testing budget of approximately USD 10 million, ensuring all offshore operations are executed safely, efficiently, and within cost. I lead, plan, and coordinate end?to?end well testing campaigns, including surface well testing, drill stem testing, fluid sampling, data acquisition, perforation, coil tubing, cementing, and stimulation services. I actively participate in HSEIA (Health, Safety, Environment, and Impact Assessment) reviews and provide technical recommendations to HSE engineers for safe operational procedures and best practices. I ensure that all well testing procedures are detailed, risk?based, and fully aligned with company and regulatory standards. I organize and chair Key Operational Meetings (KOMs) with vendors and service providers to align on scope, timelines, deliverables, and reporting requirements. This includes coordinating daily progress updates, sharing critical information, and managing any interface issues between operations and service companies. Through close collaboration with multidisciplinary teams, I maintain a focus on operational excellence, safety, and high?quality data acquisition across all offshore well testing activities.
