

FALCON®
MULTI SERVICES LTD

Falcon Multi Services Ltd
201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	9224
Name	Abdallah Hamdy Mohamed
Date of Birth	1995-01-01
Salary (in USD)	1500/Per Month
Industry	Oilfield Services
Sub Industry	MWD / LWD
Nationality	Egypt
Primary Language	Arabic,
Secondary Language	English,
Total Years of Experience	4

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

The primary responsibility of a mudlogger is to gather real-time data and provide valuable information about the subsurface formations being drilled. They work on-site, usually in the mudlogging unit near the drilling rig, and closely collaborate with the drilling crew and geologists. Here are the key tasks and responsibilities of a mudlogger: – Data collection. Mudloggers collect samples of drilling mud and rock cuttings at regular intervals as drilling progresses. They carefully examine and log these samples, documenting vital information such as lithology, color, texture, and the presence of hydrocarbons. – Gas detection. Mudloggers are trained to detect and monitor the presence of hydrocarbons in the drilling mud. They use specialized equipment, such as gas detectors, to identify the presence of potentially valuable oil or gas reservoirs. – Monitoring drilling parameters. Mudloggers monitor and record drilling parameters, including rate of penetration, weight on bit, and mud flow rates. These parameters provide valuable insights into the drilling process and can help identify changes in formation characteristics. – Formation evaluation. Mudloggers analyze the data collected from drilling mud and cuttings to evaluate the properties and characteristics of the subsurface formations. They identify potential zones of interest, assess reservoir quality, and provide valuable input to geologists and drilling engineers. – Reporting. Mudloggers prepare detailed reports summarizing the collected data, significant events, and observations during drilling operations. These reports are essential for providing a comprehensive understanding of the wellbore conditions and aiding decision-making processes.

Work at difficult environments and in all countries in the world. Leadership, creative and self confident.

Education Summary

Course	University	Passing Year	Country
Geology	AlAzhar	2019	Egypt

Career Summary

Position	Employer	Country	From	To
Mud logger	Petroservices	Egypt	01/2022	04/2026
