

FALCON[®]
MULTI SERVICES LTD

Falcon Multi Services Ltd

201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	9323
Name	Mario nino
Date of Birth	1989-09-16
Salary (in USD)	8000/Per Month
Industry	Drilling / Rig
Sub Industry	Drilling Manager
Nationality	Mexico
Primary Language	Spanish ,
Secondary Language	English,
Total Years of Experience	14

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

Drilling Superintendent / Drilling Supervisor / Drilling Engineer with 13+ years of experience leading complex onshore / offshore well construction campaigns for PEMEX and U.S. operators (Marathon, Repsol, and EOG Resources). Directed HP/HT and directional wells exceeding 8,000 meters in Mexico's Sureste Basin - formations sharing similar pressure, lithology, and torque/drag challenges to the Eagle Ford, Anadarko, and Gulf Coast basins. Recognized for safe, efficient drilling performance, top-quartile ROP, and strong HSE leadership across multi-rig operations. Combines deep technical expertise in well design, mud systems, and cementing with proven capability to manage rigs, crews, and service contractors. Alternative skills Private pilot. Drilling Engineer / Well Design Engineer – Sureste Basin • Basin & Formation Context: Executed well planning and drilling operations in the Sureste Basin, managing HP/HT wells and depleted reservoirs comparable to Gulf Coast and Anadarko gas-bearing formations in U.S. unconventional regions. • Drilling Design & Pressure Control: Designed and executed wells in high-pressure, narrow-margin windows across the Macuspana-Muspac production area, mitigating total / partial losses through hydraulic modeling and pressure control. • Loss Management: Directed well programs in the Teotleco and Costero fields, optimizing mud properties, cementing parameters, and BHA configurations to minimize nonproductive time and loss circulation events. • Data & Performance Reporting: Delivered operational reporting to PEMEX headquarters, tracking key performance indicators and identifying recurring wellbore integrity challenges to improve future well design and execution outcomes. • Operational & Team Coordination: Oversaw field engineering and logistics for multiple assets, directing rig personnel and service vendors to ensure continuous operations, procedural alignment, and safe execution of drilling programs. PEMEX – Reforma, Chiapas, Mexico | 2014 – 2015 Workover Design Engineer / Operations Supervisor – Sureste Basin • Workover & Stimulation: Led workover campaigns and reactivation of mature wells in Macuspana-Muspac production area, coordinating coiled tubing, slickline, and acid stimulation programs to restore production in high-pressure gas wells. • Production Optimization: Executed recompletions, re-perforations, and wellbore cleanouts to enhance reservoir contact and improve production performance in depleted zones and water-sensitive formations. • Field & Equipment Coordination: Managed service contractors, and logistics across multiple rigs, supervising high- pressure units, nitrogen injection, and valve tree maintenance to well integrity and compliance with

Osha 30 well control supervisor Level

Education Summary

Course	University	Passing Year	Country
Petroleum engineer	Uanl	2012	Mexico

Career Summary

Position	Employer	Country	From	To
----------	----------	---------	------	----

Drilling supervisor	Pemex	Mexico	01/2012	03/2013
