Sub Industry	ROV Ops / Tech
Nationality	Cote D'Ivoire (Ivory Coast)
Primary Language	French,
Secondary Language	English,
Total Years of Experience	01

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

Supervised the collection, handling, storage, and transportation of hydrocarbon waste generated from vessels and port facilities, ensuring all operations were carried out in a safe, controlled, and environmentally responsible manner. Maintained strict compliance with international maritime environmental regulations, particularly MARPOL standards, as well as applicable local environmental laws and company policies. This helped significantly reduce operational risks and prevent potential pollution incidents in sensitive marine and port environments. Coordinated daily logistics and field operations, including the deployment of equipment, personnel scheduling, and route planning for waste collection activities. Ensured smooth workflow execution by anticipating operational constraints and implementing proactive solutions to avoid delays or disruptions. Worked closely with multidisciplinary teams to maintain high operational efficiency and service reliability. Implemented and enforced Health, Safety, and Environment (HSE) procedures across all operational activities. Conducted routine safety checks, monitored field compliance, and contributed to the continuous improvement of safety performance indicators. Actively promoted a strong safety culture among field staff, reinforcing adherence to best practices and risk mitigation measures. Collaborated with operational teams, supervisors, and clients to improve communication, enhance coordination, and strengthen response times during both routine operations and emergency situations. Participated in incident prevention initiatives, root cause analysis, and corrective action implementation, contributing to a measurable reduction in operational incidents and improved environmental protection outcomes. Overall, contributed to the optimization of waste management operations while ensuring regulatory compliance, operational efficiency, and the highest standards of safety and environmental stewardship.
