

**FALCON**<sup>®</sup>  
MULTI SERVICES LTD

**Falcon Multi Services Ltd**

201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

## Personal Information

<b>Candidate id</b>	9399
<b>Name</b>	Azam Ali Alvi
<b>Date of Birth</b>	1986-01-01
<b>Salary (in USD)</b>	3000/Per Month
<b>Industry</b>	Oilfield Services
<b>Sub Industry</b>	MWD / LWD
<b>Nationality</b>	Pakistan
<b>Primary Language</b>	English,
<b>Secondary Language</b>	English,
<b>Total Years of Experience</b>	14

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Well site supervision of Mud logging, Coring, LWD and Wire line logging operations. Indication of the casing and coring points as per GDO. Also Drilling, tripping and Casing simulation for optimization of drilling/ rig time Cutting lithology description. Prepare QC reports along with suggestions and recommendations Supervising directional, horizontal wells, Torque and Drag analysis keeping formation properties in view to minimize friction factor in directional and Horizontal wells, also assurance of correct well trajectory. Period check on sensors, Hydraulics, SPP and ECD computation and analysis to monitor the well condition and integrity. Defining Key Parameter Indicators (KPIs) for time efficient and save Operations. Correlation and evaluation of all available data of surrounding wells to understand the geology and mitigate the risks involve for planning and drilling Correlation and evaluation of offset wells data considering various parameters MSE, Depth of cut, identifying drilling abnormalities, abnormal pressure zones Evaluation of Hydrocarbon Shows, Gas while Drilling. Periodic check on gas chromatograph, quality assured gas Complete assistance to drilling team regarding well operations in well monitoring & execution of geological well operations in time and cost effectively Preparation of Daily Geological report, Mudlog and pressure logs and communicating to Head office Quick look Petrophysical interpretation of Wireline logs Prepare risk assessment and recommendation considering subsurface geological and drilling hazards using offset wells data Writing Well completion report and preparing Well composite log Contracts Management: Bids evaluation, cost optimization, invoice finalization Post well evaluation and sharing lessons learnt and recommendations for future well designs & planning and safe cost-effective operations Identifying and forecasting issues, discrepancies and malfunctioning and convey to Head office timely Great Wall Drilling Company (GWDC Iraq) Mud Logging Geologist (July 2017 to September 2022) Key Roles: Monitor and supervise all geological operations as per Geological drilling order (GDO). Prepare onsite daily geological reports and Mud log using drilling and litho logical data. Monitor geological drilling operation and identify formation tops, coring and casing points as per defined criteria in GDO in consultation with the assigned team geologist. Onsite QC wire line log data and tools calibration. Keep close coordination with company man, contractors for geological operations to ensure smooth safe and effective operation. Keep updated with development in drilling operations, LWD/MWD, mud logging, Pore Pressure evaluation, Directional drilling, Well Testing and Production. Worked at Numerous Exploratory & Development wells in Iraq. Describe cuttings samples. Perform gas recording and analysis. Perform oil show evaluation.

Computer  
Hardware

## Education Summary

Course	University	Passing Year	Country
BS Applied Geology	Azad Jammu & Kashmir University Muzaffarabad	2009	Pakistan

## Career Summary

<b>Position</b>	<b>Employer</b>	<b>Country</b>	<b>From</b>	<b>To</b>
Iraq	Emplyoyer	Iraq	07/2017	04/2026
