

FALCON[®]
MULTI SERVICES LTD

Falcon Multi Services Ltd

201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	9425
Name	Amro Mohammed Osman Fadoul
Date of Birth	1988-06-18
Salary (in USD)	5000/Per Month
Industry	Oilfield Services
Sub Industry	Wireline
Nationality	Sudan
Primary Language	Arabic,
Secondary Language	English,
Total Years of Experience	15

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

As a Well Testing Supervisor, I am responsible for the safe, efficient, and compliant execution of well testing operations, with full accountability for the accuracy and integrity of data acquired through the Surface Monitoring System (SMS) and sand monitoring devices. I lead the planning and on-site execution of rig-up, testing, and rig-down activities, ensuring all surface equipment and instrumentation are properly installed, pressure tested, and operated in line with approved procedures and client requirements. I ensure correct installation, calibration, and functional verification of SMS instrumentation, including pressure and temperature transmitters, flowmeters, and data acquisition systems. In addition, I oversee the installation and operation of sand monitoring devices (acoustic or erosion-based systems) to detect and quantify sand production during well flow. I continuously monitor real-time data trends from both SMS and sand monitoring systems to ensure measurement accuracy, detect abnormalities, and take immediate corrective actions to protect surface equipment and maintain well integrity. I am responsible for troubleshooting instrumentation, signal communication, and system integration issues, minimizing downtime and ensuring uninterrupted data acquisition. I validate SMS data by cross-checking with manual readings and field observations, ensuring high data quality for reservoir evaluation activities such as well cleanup, flow testing, pressure build-up, and PVT sampling. I enforce strict adherence to HSE requirements through effective implementation of PTW, TBT, and HARC, ensuring safe operations at all times. I maintain clear communication with client representatives and internal teams, ensuring accurate reporting, proper shift handovers, and timely submission of daily and final well test reports. Additionally, I mentor and supervise field personnel on SMS and sand monitoring operations, emphasizing data quality, equipment care, and operational discipline to drive continuous improvement in safety and performance.

Skills: Team leadership, Troubleshooting
 Certificates: Project Management Professional (PMP)[®] – PMI IWCF Level 4 – Well Control H2S Awareness & Safety Process Safety Fundamentals (PSF) Permit to Work (PTW) First Aid & Fire Fighting Autocad training

Education Summary

Course	University	Passing Year	Country
Petroleum Engineering	Sudan University of Science and technology	2009	Sudan

Career Summary

Position	Employer	Country	From	To
Well testing Supervisor	SLB	Oman	01/2024	
Well testing supervisor	Fahud oilfield services	Oman	03/2020	12/2023
Well testing Senior Operator	SGS	Oman	11/2018	11/2019
Well testing engineer	China National Logging Co.	Sudan	08/2012	10/2018
