-----------------------------------	--

Performed rig-up, installation, configuration, and maintenance of mud logging sensors to ensure accurate data acquisition. Monitored and recorded key drilling parameters in real time, including rate of penetration, weight on bit, torque, pump pressure, and pit volumes. Collected, prepared, and analyzed cutting samples to identify lithology and formation tops, supporting geological interpretation. Conducted gas detection and analysis using total gas readings, chromatograph data, and fluorescence to evaluate hydrocarbon shows. Identified and reported early well control indicators such as mud losses, kicks, and abnormal gas peaks, contributing to safe drilling operations. Ensured high standards of data quality control across ASCI systems, mud logs, and final well reports. Maintained continuous communication with the company representative and drilling team, providing timely updates on drilling and geological data. Adhered strictly to HSE procedures while handling drilling fluids, chemicals, and gas detection equipment, ensuring a safe working environment and compliance with industry standards.
