Industry	Engineering & Science
Sub Industry	Physicist
Nationality	Azerbaijan
Primary Language	English,
Secondary Language	
Total Years of Experience	11

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

I am responsible for ensuring the quality control and assurance of petroleum products in oil and gas operations in accordance with international standards such as ISO, ASTM, and GOST. My role includes conducting detailed laboratory analysis of crude oil, refined products, and water samples to verify compliance with technical specifications and regulatory requirements. I monitor product quality throughout production, storage, and transportation processes, ensuring that all parameters meet established standards. I am actively involved in identifying non-conformities, investigating root causes, and implementing corrective and preventive actions to maintain operational efficiency and product integrity. In addition, I prepare and review technical reports, certificates of analysis, and other quality-related documentation to support internal processes and external audits. I ensure that all laboratory equipment is properly calibrated, maintained, and operated in line with safety and quality procedures. I work closely with operations, engineering, and HSE teams to ensure seamless coordination and compliance with health, safety, and environmental regulations. Furthermore, I participate in internal and external audits, contribute to continuous improvement initiatives, and support the development and implementation of quality management systems.

Certified Internal Auditor (CQI/IRCA) – ISO 9001: Quality Management Systems Certified Internal Auditor (CQI/IRCA) – ISO 14001: Environmental Management Systems Certified Internal Auditor (CQI/IRCA) – ISO 45001: Occupational Health & Safety Management Systems Strong knowledge and practical experience in implementing and auditing integrated management systems (QMS, EMS, OHSMS) Experience in conducting internal audits, identifying non-conformities, and implementing corrective and preventive actions (CAPA) Proficient in laboratory quality control, testing, and analysis of petroleum products Good understanding of international standards (ISO, ASTM, GOST) in oil and gas industry Strong knowledge of HSE regulations and compliance requirements Skilled in technical reporting, documentation, and data analysis (MS Office tools) Strong analytical, problem-solving, and decision-making skills
